

Acknowledgments

The author would like to credit the following sources for permission to reproduce tables, figures, and extracts of text from earlier publications:

Elsevier

For permission to reprint portions of the following papers from *Image and Vision Computing* as text in Chapter 5; as Tables 5.1–5.5; and as Figs. 3.31, 5.2:

Davies (1984b, 1987b)

For permission to reprint portions of the following paper from *Pattern Recognition* as text in Chapter 8; and as Fig. 8.11:

Davies and Plummer (1981)

For permission to reprint portions of the following papers from *Pattern Recognition Letters* as text in Chapters 3, 5, 10, 11, 13; as Tables 3.2; 10.4; 11.1; and as Figs. 3.6, 3.8, 3.10; 5.1, 5.3; 10.1, 10.10, 10.11, 10.12, 10.13; 11.1, 11.3–11.11:

Davies (1986, 1987a,c,d, 1988b,c,e, 1989a)

For permission to reprint portions of the following paper from *Signal Processing* as text in Chapter 3; and as Figs. 3.15, 3.17–3.20:

Davies (1989b)

For permission to reprint portions of the following paper from *Advances in Imaging and Electron Physics* as text in Chapter 13:

Davies (2003c)

For permission to reprint portions of the following article from *Encyclopedia of Physical Science and Technology* as Figs. 8.9, 8.12, 9.1, 9.4:

Davies, E.R., 1987. Visual inspection, automatic (robotics). In: Meyers, R.A. (Ed.) *Encyclopedia of Physical Science and Technology*, vol. 14. Academic Press, San Diego, pp. 360–377.

IEEE

For permission to reprint portions of the following paper as text in Chapter 3; and as Figs. 3.4, 3.5, 3.7, 3.11:

Davies (1984a)

IET

For permission to reprint portions of the following papers from the *IET Proceedings and Colloquium Digests* as text in Chapters 3, 4, 6, 13, 21, 22, 23; as

Tables 3.3, 4.2; and as Figs. 3.21, 3.28, 3.29; 4.6–4.10; 6.5–6.9, 6.12; 11.20; 14.16, 14.17, 22.16–22.18; 23.1, 23.3, 23.4:

Davies (1988a, 1999c, 2000a, 2005, 2008)
Sugrue and Davies (2007)
Mastorakis and Davies (2011)
Davies et al. (1998)
Davies et al. (2003)

IFS Publications Ltd

For permission to reprint portions of the following paper as text in Chapters 12, 20; and as Figs. 10.7, 10.8:

Davies (1984c)

The Royal Photographic Society

For permission to reprint portions of the following papers (see also the Maney website: www.maney.co.uk/journals/ims) as text in Chapter 3; and as Figs. 3.12, 3.13, 3.22–3.24:

Davies (2000c)
Charles and Davies (2004)

Springer-Verlag

For permission to reprint portions of the following papers as text in Chapter 6; and as Figs. 6.2, 6.4:

Davies (1988d), Figs. 1–3

World Scientific

For permission to reprint portions of the following book as text in Chapters 7, 22, 23; and as Figs. 3.25–3.27; 5.4; 22.20; 23.15, 23.16:

Davies, 2000. Image Processing for the Food Industry. World Scientific, Singapore.

The Committee of the Alvey Vision Club

To acknowledge that extracts of text in Chapter 11 and Figs. 11.12, 11.13, 11.17 were first published in the *Proceedings of the 4th Alvey Vision Conference*:

Davies, E.R., 1988. An alternative to graph matching for locating objects from their salient features. In: *Proceedings of 4th Alvey Vision Conference*, Manchester, 31 August–2 September, pp. 281–286.

F.H. Sumner

For permission to reprint portions of the following article from *State of the Art Report: Supercomputer Systems Technology* as text in Chapter 8; and as Fig. 8.4:

Davies, E.R., 1982. Image processing. In: Sumner, F.H. (Ed.), *State of the Art Report: Supercomputer Systems Technology*. Pergamon Infotech, Maidenhead, pp. 223–244.

Royal Holloway, University of London

For permission to reprint extracts from the following examination questions, originally written by E.R. Davies:

EL385/97/2; EL333/98/2; EL333/99/2, 3, 5, 6; EL333/01/2, 4–6;
PH5330/98/3, 5; PH5330/03/1–5; PH4760/04/1–5.

University of London

For permission to reprint extracts from the following examination questions, originally written by E.R. Davies:

PH385/92/2, 3; PH385/93/1–3; PH385/94/1–4; PH385/95/4; PH385/96/3, 6;
PH433/94/3, 5; PH433/96/2, 5.

Collectors of publicly available image databases and utilities

To acknowledge use of the following image databases and utilities for generating a number of images presented in Chapters 15 and 21:

The Cambridge semantic segmentation online demo

The images in Fig. 15.14 were processed using the online demo available from the University of Cambridge, UK (see Badrinarayanan et al., 2015) at

<http://mi.eng.cam.ac.uk/projects/segnet/> (website accessed 07.10.16).

The CMU image dataset

The “newsradio” image used to obtain Fig. 21.6 was taken from Test Set C—collected at CMU by Rowley, H.A., Baluja, S., and Kanade, T.—and is described in their paper:

Rowley, H.A., Baluja, S., Kanade, T., 1998. Neural network-based face detection. *IEEE Trans. Pattern Anal. Mach. Intell.* 20(1), 23–38.

It may be downloaded from the website:

http://vasc.ri.cmu.edu/idb/html/face/frontal_images/ (website accessed 20.04.17).

The Bush LFW dataset

The images of George W. Bush used in Chapter 21 were taken from the set collected at the University of Massachusetts:

Huang, G.B., Ramesh, M., Berg, T., Learned-Miller, E., 2007. Labeled Faces in the Wild: A Database for Studying Face Recognition in Unconstrained Environments. University of Massachusetts, Amherst, Technical Report 07-49, October.

The database may be downloaded from the website:

<http://vis-www.cs.umass.edu/lfw/> (website accessed 20.04.17).
